

***We invite you to come open your mind
and expand your horizons.***

We are a newly expanded school with a small and energetic staff located in Jogja, the historic center of Javanese culture.

Nestling between a volcano and South Java coast, Jogja has a well deserved reputation as Indonesia's foremost educational location. Alongside its history as a home to Javanese kings, it's huge student population, drawn from all across the archipelago has helped make this engaging city home to one of the most thriving art scenes and uniquely open minded attitudes in Indonesia.

We are looking for creative, enthusiastic and motivated teachers that are able to bring "something special" to the classroom and are willing to challenge and develop their skills in a progressive and stimulating environment.

Maybe it is you that we are looking for...
